

Dear Students, Principals, Teachers, and Guidance Staff,

The Woodstock Horticultural Society (WHS) is currently seeking high school students wishing to fulfill their volunteer hours with us. We are seeking a student/s who are technologically adept and would be able to build a simple website featuring the WHS. The website would feature a landing page and several clickable features.

We are also seeking a student/s who feel they could support, contribute, and or create a successful social media campaign for us. One that generates more community awareness and or interest. This could include Instagram, flower photography or other original ideas.

The WHS has been meeting since 1883 and is a chapter of the Ontario Horticultural Association. The OHA is a volunteer charitable organization that encourages interest in gardening and related environmental issues with horticultural societies and like minded organizations by providing leadership and education.

It is my personal hope that the WHS is successful with its desire to become more technologically adept and accessible to all, and that this success is driven and supported by local youth. I hope that this connection between the WHS and local high school volunteer students can be used as a model for other local societies in the OHA to connect with their local high school students. Societies that are very much in need of basic technical support services.

As a thank you to the student/s involved a reference letter detailing the work provided will be written by me, Lesli Fisher, President of the WHS, member of the Ontario College of Teachers, and TVDSB teacher.

Interested students please contact me through the information provided below.

Sincere thanks to all who assist us with this project.

Lesli Fisher
